

# System ROOFING

Clear, coloured or opal Hammerglass solutions for walls or ceilings. The panels are available in lengths up to 6 metres, or spliced into infinite lengths with waterproof dressings.

## Advantages

- Half the weight of plain glass
- 300 times stronger than glass - no glass breakage
- The panels are produced after measurement and after the steel skeleton etc has been fully assembled
- Turnkey solutions for securing and installation
- May also be supplied in IR form, with 50% heat reduction

## Design and installation

Bring us into your discussions at the idea stage. Our designers will prepare drawings and offer suggestions for functional solutions. We will be happy to provide tenders for complete projects: Made-to-measure Hammerglass, posts, fixing systems and installation.

## Draft regulatory text

*"The panels shall be made from 12 mm chemical-resistant (must withstand acetone), hard-coated polycarbonate offering at least 99.96% UV protection, type Hammerglass."*

## Technical specifications

Max Hammerglass width	2000 mm
Max Hammerglass length	6000 mm
Hammerglass thickness	4, 6, 8, 10, 12, 15, 17 and 20 mm
