

HAMMERGLASS SCREENSAVER

- NEVER LOSE SIGHT -

SELF-HEALING PROTECTIVE FILM WITH EXTRA LONG LIFE SPAN

NEVER LOSE SIGHT WITH HAMMERGLASS SCREENSAVER

Hammerglass ScreenSaver PROTECTIVE FILM is an invisible shield that is reducing wear, scratches and marks from stone chips on your Hammerglass screen.

When you use the protective film, the life of the window is extended while the optical quality is ensured. In addition to being resistant to external damage, the protective film also has self-healing properties. The unique film composition, consisting of a flexible multi-layer construction in polyurethane, effectively creates the best possible protection for the underlying pane. Unlike many of the market's other protective film solutions, Hammerglass ScreenSaver protective film is very easy to install, as it has a balanced adhesion and shorter curing time.

Premium Quality • Short curing time • Self healing • Long lasting optical improvements for the driver • Prolongs the life span of the screen • Contributes to an even better life cycle cost • Making an outstanding safety screen even better

Hammerglass ScreenSaver PROTECTIVE FILM - Technical Data	
Product thickness (Film)	6 mil (0.16 mm)
Colour	Clear/Transparent
Elongation	400 %
Rock chip resistance	Pass SAE J4000 Gravelometer*
Outdoor weathering	Pass 24 month Arizona 45° test
Chemical/Fluids resistance	Isopropanol/Water (1:1), Carburetor (Spray/Rub Test)
Storage and installation temperature	15-30 °C
Curing time	Recommended 12-48 h

Installation

For installation guide regarding installation of the Hammerglass ScreenSaver visit:
www.hammerglass.com/automotive/installation/

*Gravelometer Testing

Gravelometer testing is designed to evaluate the resistance of vehicle surface coatings (paint, clear coats, metallic plating etc.) to chipping caused by the impacts of gravel and other flying objects in accordance with SAE and ASTM standards. For more information visit:
www.nts.com/services/testing/materials/gravelometer/
